Self-Portrait with Pasta

Supplies

- Construction paper or other heavyweight paper
- markers, crayons or paint (and a paintbrush)
- any uncooked pasta shapes: spaghetti, rigatoni, bowties, macaroni, etc.
- school glue

Instructions

1. Draw a circle or face shape on the paper.
2. Glue pasta on the paper to make the facial features and hair.
3. *Optional:* paint or use markers to color the pasta before gluing. If using paint, you'll need to let it dry before gluing.

Another idea: If you have the time, you can dye the pasta before using. It will take several hours (almost all of it is drying time). Here's the how-to link: <https://parentingchaos.com/dye-pasta/>
