Bird Nest

Supplies

- Paper plate
- Twigs, moss, ivy, leaves – whatever you can find outdoors
- School glue
- Yarn
- Scissors

Instructions

1. Collect twigs, moss, ivy and other natural items for your nest. **Dry things will glue better and damp things will wrap better.
2. Using the paper plate as a base, stack or weave the twigs, ivy, etc., on the plate in the shape of a nest. You can use glue to strengthen the structure – do this while you're building.
3. If you have moss or leaves, you can use them to line the nest.
4. Wrap the yarn around a short stick to make the bird eggs. **In the photo on the left, pieces of a plastic bag are used instead of yarn.
